LUKSAYAPORN JEENSEENUM

Product Designer (UX/UI) Bangkok · luksayaporn.j@gmail.com · 062-394-9497 · linkedin.com/in/luksayaporn · **luksayapornj-beep.github.io**

PROFILE

Product Designer with 7 years at INDIGY PCL, moving from software testing to business analysis to UX/UI design. I design web, mobile, kiosk, POS and admin systems with many user roles and business rules, and catch edge cases before development starts. I use AI to accelerate exploration and drafting, with design decisions grounded in requirements, business logic, and system constraints.

SKILLS

Product & UX: Product Design · UX/UI Design · User Flows · Information Architecture · Design Systems · Interaction Design · Prototyping

Complex systems: Requirement Analysis · Business Logic · Edge Cases · Multi-role Systems

Delivery & tools: Figma · Developer Handoff · UAT · Agile · Cross-functional Collaboration · AI-assisted Design

EXPERIENCE

UX/UI Designer — INDIGY PCL

Jul 2021 – Present

The only UX/UI designer in the company. Set up the component library and the handoff and UAT documents.

Enterprise Visitor Management System — F&B manufacturer · web + handheld

> Merged 4 visitor journeys into one workflow for 5 roles, with PDPA consent and security logging built in.
>
> → Outcome: **Launched, passed UAT. Built to reduce open records at shift end and show who is on site at any time.**

BIZ+ Digital Café Solution — F&B POS & operations platform

> Created one order-status model for 6 touchpoints: POS/MPOS, kiosk, table QR, kitchen display, admin, LINE OA.
>
> Designed failure paths first (payment, refund, timeout): a stuck order ties up a table and a staff member.
>
> → Outcome: **Launched. Aimed to reduce order corrections and end-of-day reconciliation.**

Field-sales CRM & Sales-operations Platform — FMCG distributor · tablet

> Sole designer of a tablet app built for 600+ field sales users and 6,000 transactions a day: route plan, check-in, billing and payment in one flow on the client's ERP.
>
> With the BA, made ERP waits visible as bill states and let a rejected bill be fixed, not restarted.
>
> → Outcome: **Launched in two phases, 2023–2024. Replaced a multi-step legacy sales app.**

Healthcare POS, CRM & Clinic Operations Platform — multi-branch aesthetic clinic

> With the PM and BA, designed one platform for POS, CRM, appointments, course packages and inventory, where front desk, doctors on tablet and management share one customer course balance.
>
> → Outcome: **Launched in two phases. Replaced Excel records and paper OPD files.**

Property Marketplace & Virtual Showroom — AP Thai

> Sole designer for property search, 360° virtual tour and real-time unit booking. Launched Feb 2022.

Consumer Mobile Booking — Soulfit · iOS / Android

> Designed the pilates class booking flow so first-time users can book without help. v1.0 released Jan 2025.

ALSO DELIVERED

Internal enterprise platforms: employee portals, intranets, board & executive systems, KPI & performance dashboards across banking, energy and corporate

Operations & business systems: service & work management, workforce, learning, and merchant operations

Customer-facing products: community, membership & loyalty, AI, healthcare and lifestyle applications

Junior Business Analyst — INDIGY PCL

May 2020 – May 2021

Requirement and gap analysis, BRDs, process flows, solution design and prototypes for pre-sales.

Software Tester (Intern) — INDIGY PCL

May 2019 – Apr 2020

Manual testing on web and mobile, test cases, defect reporting.

EDUCATION

B.Sc. Information and Communication Technology · Silpakorn University 2016 – 2020
